FULL STACK WEB DEVELOPER

Current Full-Stack web developer with 6 months of freelance work focused on creating and deploying websites. Websites demonstrate core knowledge of front-end, back-end, data-base integration, and user experience. Eager to learn as much as I can about code and all types of different languages.

TECHNICAL SKILLS

Languages: HTML/CSS, JavaScript, CSS, HTML5, JSON, JQuery, React, Node.js

Data Manipulation & Visualization: Bootstrap, Materialize

Database: MySQL 5.7, MongoDB, Firebase

Other: Heroku, Git, GitHub, GitBash, Microsoft Office Suite

PROJECTS

Ethnic Eats - https://tp222.github.io/Project_1/ | https://github.com/tp222/Project_1

Web application designed to locate recipes based on ethnic preference and ingredient preference.

- Worked in a team of 3 to create a website that allows users to pull recipes from an API given 2 search criteria: ethnicity and preferred ingredient.
- Tools used: HTML5, CSS, JavaScript, jQuery, Recipe API, Materialize, GitHub, and Firebase.
- Wrote javascript for user interactions and styled the website with materialize as well as establishing API calls to render recipe cards.

Literary Fitness - <https://project2-teas.herokuapp.com/#/> | <https://github.com/tp222/Project-2>

Full-Stack web application created to track books users' read.

- We built this website to track completed books as well as books currently in progress, in which users may input and update their current page progress per book.
- Tools used: HTML5, CSS, Materialize, JavaScript, jQuery, Book API, Express, Sequelize, MySQL, GitHub, Animate.css and Heroku.
- Wrote HTML and CSS code for UI.

Racquet Rally - <https://racquet-rally.herokuapp.com/> | <https://github.com/lmasullo/rally>

Full-stack web application that allows users to find other tennis players in their area to play with.

- This application was designed for users to favorite courts all around Austin, as well as locate players who favorited the same courts. With this knowledge, users can reach out to each other and find new hitting partners at any court in Austin.
- Tools used: Node.JS, Express, MySQL, Sequelize, Google Authentication, HTML5, CSS, Materialize, Javascript, jQuery, GitHub, and Heroku.
- Worked on various pages of the website to incorporate court database information. I used HTML and React to map out court details. Worked on react layout with fellow team members.

WORK EXPERIENCE

GrubHub Caterer | Austin, TX

September 2017- Present

Picked up, delivered, and arranged food for various companies.

- Adhere to my own set schedule weekly.
- Interacted with restaurants and companies to resolve any conflicts.
- Accustomed to working under pressure in meeting time frames and customer's specific needs.

Amazon Logistics | Austin, TX

September 2015 - September 2017

Delivered Amazon packages throughout Austin and surrounding cities.

- Organized various size packages into my vehicle prior to setting out for deliveries.
- Followed instructions given by Amazon and specific apartment complexes to ensure packages are delivered safely.
- Resolved conflict between Amazon customer support and apartment complexes in regard to package delivery.
- Always had packages organized well so that deliveries would run smoothly.
- Completed all deliveries well within the allotted time frame.
